

In times of crisis, actions speak louder than words.

At Chiesi, we believe in acting as a force for good, extending our reach beyond business to make a tangible difference in the world. In alignment with our core values and our dedication to Shared value & Sustainability principles, we are proud to share our humanitarian efforts in Ukraine during the challenging years of 2022 and 2023.

In 2022, responding to urgent medical needs, we donated essential pharmaceutical products

- for the treatment of premature infants at risk for Respiratory Distress Syndrome (RDS),
- for patients after liver or kidney transplantation an immunosuppressant product,
- patients with cystic fibrosis an antibiotic for the management of chronic pulmonary infection and
- a non-steroidal anti-inflammatory product indicated for symptomatic relief of osteoarthritis and rheumatoid arthritis.

Continuing our support into 2023, we provided the same products as in 2022, and, notably, also a rare disease product for treatment of alpha-mannosidosis, addressing some of the most pressing health challenges.

These donations were more than a corporate responsibility; they reflected our commitment to improving lives. Our team worked to ensure these life-saving medications reached those in need.

Chiesi stands firm in its resolve to offer hope and support, leveraging our expertise and resources for the greater good.
